How-to-Sell

BE600M1 shown

What does an APC Back-UPS do and why do you need one?

A UPS (uninterruptible power supply) functions exactly as its name implies; it will power your electronics during power outages and other power disruptions while simultaneously protecting them from dangerous surges and energy spikes.

The APC Back-UPS will keep your critical electronics powered for hours during extended power outages after shutting down PC, TV and other high power equipment so your mobile and internet devices allow you to stay **productive, entertained** and **connected**.

How long can these devices be powered?

	Watts	BE425M	BE600M1	BE850M2
Internet modem and router	10	2.3 hours	4.3 Hours	5.9 hours
Entry level PC	40	45 minutes	67 Minutes	90 minutes
Notebook computer + network gateway	80	15.6 minutes	30 Minutes	41 minutes
Mid range PC with 20" LCD + Notebook + network gateway	180	4.9 minutes	10 minutes	14.8 minutes
Smartphone (Built-in USB charging port)	-	N/A	7 full charges	9 full charges

How-to-Sell

Never let a power disruption interrupt your life again, with the new APC Back-UPS powering your critical electronics:

- Check email
- Stream movies and TV shows
- Make phone / video calls
- Check and update social media
- Continue gaming
- Maintain home automation and security systems

Stay connected for hours, not minutes

Power your wireless home networking equipment (router and modem) and maintain your internet connection for 2+ to nearly 6 hours after safely shutting down your PC or other high powered devices depending on the APC Back-UPS in use

Charge and power more devices at once

4-6 battery backup and surge protected outlets with an additional USB charging port ensures you have emergency power for any device depending on the APC Back-UPS in use

*USB ports vary by model

Outlet spacing to handle low power device transformer blocks

After safely shutting down your high power equipment, run low power devices (home networking equipment, VOIP) for hours

Reliable surge protection for peace of mind

Ensure your valuable electronic investments against damaging lightning, surges and spikes

Quick mute

Reliably silence alarms with the touch of a button

Multiple alarm settings

Customize your power notifications so you only get information that is important to you

3 year warranty, \$75,000 Equipment Protection Policy

UPS and connected equipment insurance from the industry's most trusted power protection manufacturer

Certainty in a Connected World

Life Is On
