## Highlights

### Perfect for accent lighting

This LED spot light provides a focused beam of bright light, perfect for creating extra dimension and depth with accent lighting.

### Warm white light(2200 - 2700)K

Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more cozy light, while those with a higher Kelvin value produce a cool, more energizing light.

### WarmGlow dimming

With this dimmable bulb, you can dim from a 2200k warm light to a 2700K light. The more you dim, the warmer the light.

### Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get the glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.
